

is looking for
**à Frontend Engineer - Angular
CDI**

Job Description

Proxistore is a complete web-to-store solution for merchants, shops, store chains... It is a solution to significantly increase your traffic and acquire new customers at your point of sale thanks to local -based online advertising.

We are looking for a Frontend Engineer - Angular (CDI). The Frontend Engineer plays a key role as a member of the Development Team in fulfilling the company's mission – Build the universal drive-to-store platform. The Frontend Engineer is accountable for developing and optimizing our advertising platform, written in Angular 7, which would require a few upgrades and cleanup here and there. The candidate should be autonomous and willing to improve an existing code base. State of the art web design is not a requirement, but the candidate should be able to integrate his work in the application.

What you will need:

- 5+ years of software development experience
- Strong experience on Angular2+ large scale projects
- Ability to effectively articulate technical challenges and solutions
- Willing to discuss and challenge business requirements with the sales team
- Ability to work with JSON REST APIs
- Strong communicator

Nice to have:

- Experience with PrimeNG components
- Experience with RxJS
- Experience with React.js for potential upcoming projects
- UX design
